

300-Series Control Consoles 125/250 Channel Memory

Cat. No. 91703
125-Channel Memory Console

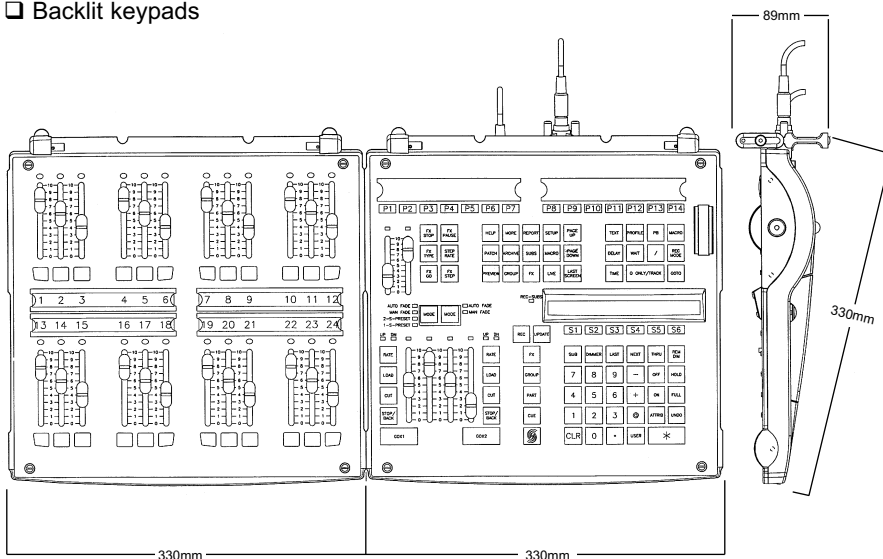

MEMORY CONTROL CONSOLE

- Two models available with 125 channels/125 attributes or 250 channels/250 attributes
- 24 fully overlapping submasters
- Easily configured for single or two tier operation
- Channel capacity upgrades available
- Powerful Pentium class processors provide performance and reliability
- Second video port option available
- ShowNet Ethernet functionality standard on all models
- Full support for automated lighting
- Compatible with 500-series consoles
- Wide range of accessories
- Backlit keypads

All two tier consoles feature a unique folding design to simplify handling and storage. Touring companies will appreciate the reduced packing space that this feature offers.

All Strand consoles use the proven Genius Pro/Lightpalette operating software offering support for Preset or Tracking Style operation for the first time in a small to mid range console. Motion control is a standard feature of the 300 series and is fully implemented using our Intelligent Trackball/Mouse support.

125 Channel Memory

The processor module is the heart of any 300 series control system. Offered in a wide range of channel capacities and features, all processor modules can be easily upgraded. Powered by Pentium class processors, the 300 series controllers offer the performance operators have come to expect from Strand Consoles.

300-Series Control Consoles 125/250 channel memory

The flexible modular construction allows controller panels to be configured for optimum operation. Modules may be arranged in any format and may be separated by up to 300 feet.

Cat. No. 6300 Fader Module

Remote fader modules are fully supported with all 300 series consoles. Modules are connected to the system processor using low cost Category 5 cable.
