

Auxiliary Control Unit

- ❶ AC Wiring Compartment
- ❷ DMX In & DMX Out
- ❸ I/O Terminal Strips

IPS-AC-100

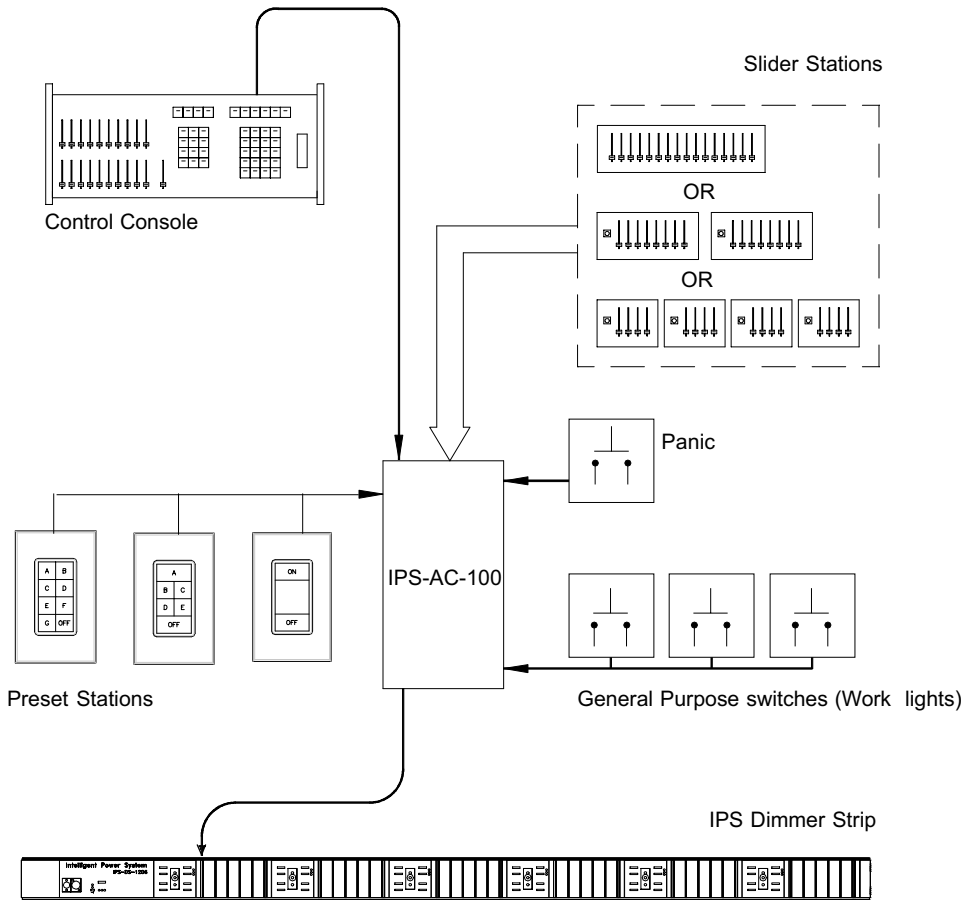

The IPS-AC-100 Auxiliary Control Unit allows slider stations, switches and pushbutton preset stations to control IPS dimmers. Common applications include house light controls, work light controls and console backup controls.

The IPS-AC-100 allows the user to assign control of an IPS dimmer to a particular potentiometer or other analog device. The IPS-AC-100 may also be used to record and recall IPS dimmer presets using a pushbutton preset control station.

- ◆ Use when house light, work light and console backup controls are needed
- ◆ Assigns any dimmer to a slider or work light switch
- ◆ Assign any dimmer to Panic, regardless of other assignments
- ◆ Records presets and fade times to IPS dimmers
- ◆ Available in wall or 19" rack mount

Application

Outline Specification

IPS-AC-100	
Power requirement	2 Amps 120 or 240 Volts AC
Input/Output connections	Terminal strips
Maximum number of slider control channels	16
Maximum number of "Take Controls"	4
Maximum number of general purpose (work light) switches	3
Maximum number of dimmer presets	7 presets and Off
Preset fade time range	1 second to 15 minutes
Panic inputs	1
Console DMX (per channel)	Highest takes precedence or Ignore
Height	12" (30.5cm)
Depth	4" (10cm)
Width	10" (25cm)
Weight	3.5 lbs (1.6kg)

Order Checklist

IPS-AC-100	Auxiliary Control Unit
IPS-AC-100-R	Auxiliary Control Unit - Rack Mount
IPS-AC-302	Two Button Control Station
IPS-AC-306	Six Button Control Station
IPS-AC-308	Eight Button Control Station
IPS-AC-2()	Slider Control Station (specify number of sliders)
